

Junior Power BI Developer | Data Analyst

 Military Service : Completed

Junior Power BI Developer and Data Analyst with hands-on experience in Power BI, DAX, Power Query, SQL, and data modeling. Skilled in transforming raw data into interactive dashboards and actionable business insights. Experienced in data cleaning, KPI development, report automation, and business intelligence reporting through academic projects and professional training. Passionate about leveraging data to support decision-making and continuous business improvement.

- Conducted data and business analysis, market research, and deal sourcing to assess startups aligned with HP's investment criteria.
- Created investment summaries and presented data-driven insights to support strategic decision-making.

- Built interactive dashboards and reports using Power BI and Excel, turning raw data into actionable insights.
- Cleaned and transformed large datasets using Power Query and DAX, improving processing time by 25%.
- Reduced report generation time by 20% by identifying key KPIs in collaboration with teams.
- Published and maintained reports using Power BI Service and collaborated on dashboard sharing.

- Cleaned and transformed passenger data to improve data quality and consistency.
- Analyzed factors affecting passenger survival, including age, gender, class, and embarkation port.
- Built interactive Power BI dashboards to visualize survival trends and key demographic insights.

- Developed an interactive dashboard to analyze sales trends across different states and vehicle categories.
- Identified high-demand vehicle types, pricing patterns, and market trends through data analysis.

- Designed SQL queries to extract, clean, and analyze employee data before building Power BI dashboards.
- Reduced report generation time by 20% by identifying key KPIs in collaboration with teams.

- Analyzed sales performance, customer behavior, and product trends using transactional sales data.
- Built interactive Tableau dashboards to track KPIs, revenue trends, and customer purchasing patterns.

Technical Skills — Power BI, Power BI Service, DAX, Power Query, SQL, Excel, Tableau, Data Modeling, ETL Concepts, Data Visualization, Python (Basic).

Soft Skills — Problem-Solving, Analytical Thinking, Communication, Adaptability, Teamwork
